AI-BASED INCLUSIVE HIGHER EDUCATION

ERASMUS+ KA220
2024-1-PL01-KA220-HED-000256427

New project has started!

INEDU is a two-year Erasmus+ project co-funded by the European Union. It focuses on using AI-based tools to support students with disabilities in HE. The project aims to create innovative solutions that enhance inclusive learning environments.

Partnership

THE PONTIFICAL UNIVERSITY OF JOHN PAUL II IN KRAKOW (Poland)
FLORIDA CENTRE DE FORMACIÓ COOP.V (Spain)
KAUNAS TECHNOLOGICAL UNIVERSITY (Lithuania)
BAYREUTH UNIVERSITY (Germany)

Funded by

NEWSLETTER 01

Kick off Meeting in Kraków, Poland

The project Kick-Off Meeting took place on November 5-6 in Kraków, Poland, bringing together representatives from all partner institutions. During the meeting, partners discussed the main objectives, the timeline, and the first steps in developing AI-driven tools for inclusive education.

Project goals

The **INEDU** project aims to improve access to HE for students with disabilities by leveraging AI. Key objectives include developing AI-powered assistive technologies and sharing best practices among educational institutions. The project also seeks to raise awareness about the challenges faced by students with disabilities and propose solutions that can be implemented across European universities.

Compendium – First Phase of the Project

The Compendium of best practices, needs analysis, and AI-driven inclusion strategies. It will serve as a foundation for the development of further tools and methodologies within the project. The compendium will provide valuable insights for policymakers, educators, and technology developers interested in fostering inclusivity in higher education.
